

Bid documents for the Road Rehabilitation Project were sent out in mid-September and are due to the Town on September 26. The Town will select a vendor by early October and plans to have the work completed by end of fiscal year 2014.

The purpose of the Road Rehabilitation Project is to repair those town streets which are in disrepair with cracks, potholes and damaged pavement.

Please find attached the Street Renovation map showing the rehabilitation areas. Individual maps of those specific areas are available at Town Hall. Call Town Manager, Gene Swearingen (301-933-7488), email (garrett-park@comcast.net), or drop by the Town Office if you have questions, concerns, or would like to see the more detailed maps.
